Mpur

Adaptability

M-pur gives full consideration to space and target user.

- It creates traditional or modern diversified styles to meet the requirements of mobile office and static office in the new century.
- Privacy and openness is optional and switchable.
- Lightweight multimedia: high efficiency, small input, wide applications, user-friendly multimedia applications
- The considerate function design, storage, wiring and various accessories enable personalization and convenience.

Multi-function

Workstations for employees, managers, directors, trainings and conferences.

Color variety

Rich expression from four dimensions

Spring, summer, autumn and winter

Wide price range

Wide budget range available, perfect for different stages of corporate development

Stable, modular and user-friendly

- The comprehensive modular structure enables a more stable combination, multi-angle connection and convenient recombination.
- Flexible and powerful wiring function: Realizing comprehensive and well-organized wiring management.
- The standard cloth screen adopts a combination of wood and metal, creating a more stable structure and optimized noise insulation effect than the metal structure.
- The auxiliary functions double the working efficiency: The introduction of creative tray and pen container makes the work plan more visible.
